Mechanical Engineer (PE License)

ITS is looking for a licensed Mechanical Engineer to join our team in Georgetown, KY. The chosen professional must have a *PE License* or at least have taken the *FE exam* and passed.

The Engineer will provide technical applications support in the project development stage and oversee project installation at end user facilities. The chosen Engineer will be responsible for creating designs as well as configuring older ones. Communication skills required in order to speak with customers to understand their needs. Will require travel to job sites to observe production lines and assist with installation. Must be willing to travel approximately 30%.

The Engineer will be responsible for the following:

- Assess customer needs and provide feedback to management to determine how to provide effective product, equipment, service, training and aftercare to them.
- Develop customer needs and calculate costs in order to provide project development through cost, time and manpower.
- Mechanical design of conveyor/robot integration/automation system.
- Act as the Project Manager to install end products to customer and completing the following:
  * Check and confirm all floor layouts to prints /drawings.
  * Confirm installation specifications according to bid documents.
  * Coordinate all technical issues with ITS and customer and contractors.
  * Coordinate customer-required and contractor meetings to assure continuity of efforts and communicate status and concerns.

Preferred Qualifications:

- Must hold a valid PE License
- 4-Year College Degree or equivalent experience
- Design Background
- Knowledge in SolidWorks and AutoCAD
- Experience in Robotics and Conveyors
- Strong interpersonal skills to interact with customers and vendors.
- Automotive industry experience
